Chapter 37		
irculatory and l	Respiratory Sy	ystems
<b>Section 37–1 The C</b> i this section describes the circula		
unctions of the Circula	tory System (page 94	13)
1. Why do large organisms i	require a circulatory syst	tem?
<b>2.</b> What is a closed circulator	ry system?	
<b>3.</b> List the three components	of the circulatory system	m.
a	_ b	C
<ul> <li>almost entirely of muscle.</li> <li><i>latch each heart structure with</i></li> <li>Structure</li> <li>5. pericardium</li> <li>6. myocardium</li> <li>7. atrium</li> <li>8. ventricle</li> <li>9. The heart pumps about</li> <li>0. Dividing the right side of called a(an)</li> <li>1. Is the following sentence for separate pumps</li> </ul>	<i>its description.</i> <b>Description</b> <b>a.</b> Thick layer of me <b>b.</b> Sac of tissue that <b>c.</b> Upper chamber of <b>d.</b> Lower chamber of time the heart from the left s <u></u>	of the heart es per minute. ide is a wall
<b>12.</b> Complete the compare/co		VETEM
	THE CIRCULATORY S	
Name of Circulatory Pathway	Side of Heart Involved	Route Blood Follows
Pulmonary circulation		From heart to lungs
	Left side	

### Chapter 37, Circulatory and Respiratory Systems (continued)

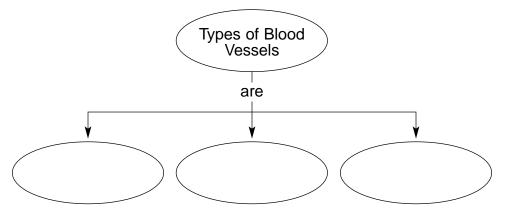

**14.** Why is the blood that enters the heart from the systemic

circulation oxygen-poor? \_\_\_\_\_

- **15.** Circle the letter of each sentence that is true about blood flow through the heart.
  - **a.** Blood enters the heart through the right and left atria.
  - **b.** Blood enters the heart through the right and left ventricles.
  - **c.** Blood flows from the ventricles to the atria.
  - **d.** Blood flows out of the heart through the right and left atria.
- **16.** Flaps of connective tissue called \_\_\_\_\_\_ prevent blood from flowing backward in the heart.
- Each heart contraction begins in a small group of cardiac muscle cells called the \_\_\_\_\_\_ node.
- **18.** Cells that set the pace for the beating of the heart as a whole are called the \_\_\_\_\_\_.

### Blood Vessels (pages 946–947)

**19.** Complete the concept map.

- **20.** Circle the letter of each sentence that is true about arteries.
  - **a.** Most carry oxygen-poor blood. **c.** They have thin walls.
  - **b.** They can expand under pressure. **d.** The largest is the aorta.
- **21.** Is the following sentence true or false? The smallest of the blood vessels are the capillaries. \_\_\_\_\_
- **22.** What work is done in the capillaries? \_\_\_\_\_
- **23.** What keeps blood flowing toward the heart in the largest veins? \_\_\_\_\_

Name	Class	Date
Blood Pressure (pages 948–949	)	
24. The force of blood on the wal		
<b>25.</b> Is the following sentence true when the heart relaxes.	or false? Blood pressure increase	25
Aatch each time of blood pressure and	th the force it measures	
Match each type of blood pressure wi	Force It Measures	
• -	<b>a.</b> Force of the blood when the	e ventricles relax
27. diastolic		
8. Is the following sentence true pressure is 140/80.	or false? An average adult's bloc	od
9. How does the autonomic ner		
	5 0	
-		
<b>Disorders of the Circulator</b> <b>1.</b> A condition in which fatty de		
arteries is called	· ·	
<b>32.</b> High blood pressure also is ca	alled	
<b>33.</b> Is the following sentence true	or false? High blood pressure	
increases the risk of heart atta	ck and stroke	
<b>34.</b> Circle the letter of each senter	nce that is true about heart attack	
<b>a.</b> It is caused by atherosclero	osis in the coronary arteries.	
<b>b.</b> It occurs when part of the	heart muscle begins to die.	
<b>c.</b> Its symptoms include naus	•	
<b>d.</b> It requires immediate med		
	or false? A stroke may be caused	-
	g to the brain.	
<b>36.</b> List the four keys to avoiding		
a		
b		
c		
d		

Chapter 37, Circulatory and Respiratory Systems (continued)

## Section 37–2 Blood and the Lymphatic System (pages 951–955)

*This section describes the functions of the different components of blood. It also outlines the role of the lymphatic system.* 

### Blood Plasma (page 951)

- 1. The straw-colored fluid portion of blood is called
- 2. Circle the letter of each sentence that is true about plasma.
  - **a.** It makes up 90 percent of the volume of blood.
  - **b.** It is about 55 percent water.
  - c. It contains only dissolved gases and salts.
  - d. It contains both nutrients and enzymes.

Match each type of plasma protein with its function.

· · · ·	Type of Protein	Function
	3. albumin	<b>a.</b> Helps blood clot
	4. globulin	<b>b.</b> Transports substances
	5. fibrinogen	<b>c.</b> Fights infections

### Blood Cells (pages 952–954)

**6.** List the three types of blood cells.

a. \_\_\_\_\_

b. \_\_\_\_\_

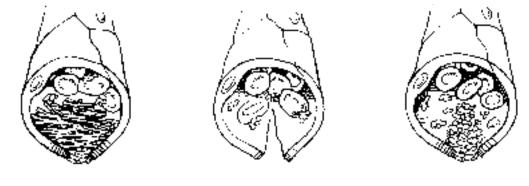

- 7. Circle the letter of each sentence that is true about red blood cells.
  - **a.** They are the least numerous cells in the blood.
  - **b.** Their role is to transport oxygen.
  - c. They contain hemoglobin.
  - **d.** They are produced in the bone marrow.
- 8. Is the following sentence true or false? Mature red blood cells have two nuclei.

**9.** Circle the letter of each sentence that is true about white blood cells.

- **a.** They contain a nucleus.
- **b.** They attack foreign substances.
- c. They contain hemoglobin.
- **d.** They are also called leukocytes.
- **10.** Is the following sentence true or false? Most white blood cells live for an average of 120 days. \_\_\_\_\_
- 11. White blood cells that engulf and digest foreign cells are called

Name	Class	Date	
Match the type of white blood cell with its function.			
Cell Type	Function		
<b>12.</b> eosinophils	<b>a.</b> Produce antibodies		
<b>13.</b> basophils	<b>b.</b> Attack parasites		
14. lymphocytes	<b>c.</b> Release histamines		
<b>15.</b> What does a sudden increase in the number of white cells tell a			
physician?			

- **16.** List the two components of blood that make clotting possible.
  - a. \_\_\_\_\_ b. \_\_\_\_
- **17.** Number the drawings below to show the correct sequence in which a blood clot forms when a blood vessel is injured.

**18.** A genetic disorder that results from a defective protein in the clotting pathway is \_\_\_\_\_\_.

### The Lymphatic System (pages 954–955)

- **19.** What is the lymphatic system? \_\_\_\_\_
- **20.** The fluid lost by blood is called \_\_\_\_\_\_.
- **21.** Circle the letter of each choice that is a function of lymph nodes.
  - **a.** Trapping bacteria **c.** Preventing backward flow of lymph
  - **b.** Helping blood to clot **d.** Producing lymphocytes

# **Reading Skill Practice**

When you read a section with difficult material, writing a summary can help you identify and remember the main ideas and supporting details. Write a concise paragraph summing up the material under each heading in Section 37–2. Each of your paragraphs should be much shorter than the text under that heading in your book. Include each of the boldfaced vocabulary terms in your summary. Do your work on a separate sheet of paper.

Chapter 37, Circulatory and Respiratory Systems (continued)

## Section 37–3 The Respiratory System (pages 956–963)

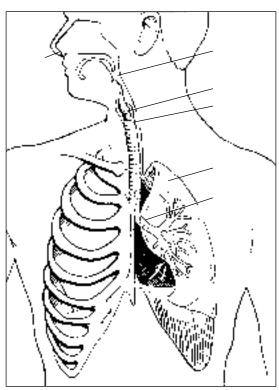

*This section identifies the structures of the respiratory system and explains how we breathe. It also describes how smoking affects the respiratory system.* 

### What Is Respiration? (page 956)

**1.** The process by which oxygen and carbon dioxide are exchanged between cells, the blood, and air in the lungs is known as

### The Human Respiratory System (pages 956–958)

- 2. What is the basic job performed by the human respiratory system? \_\_\_\_\_
- **3.** Label each of the following structures in the drawing of the human respiratory system: nose, pharynx, larynx, trachea, bronchus, and lung.

- **4.** Circle the letter of the choice that lists the respiratory structures from largest to smallest.
  - **a.** Alveoli, bronchioles, bronchi **c.** Bronchi, bronchioles, alveoli
  - **b.** Bronchioles, bronchi, alveoli **d.** Bronchi, alveoli, bronchioles
- 5. What prevents food from entering your trachea? \_\_\_\_

Name	Class Date
<i>Match each structure of the res</i> <b>Structure</b>	viratory system with its description. <b>Description</b>
<ul> <li> 6. pharynx</li> <li> 7. trachea</li> <li> 8. cilia</li> <li> 9. larynx</li> <li> 10. bronchi</li> <li> 11. alveoli</li> <li>Gas Exchange (page 958)</li> </ul>	<ul> <li>a. Tiny air sacs where gas exchange occurs</li> <li>b. Tiny projections that sweep trapped particles and mucus away from the lungs</li> <li>c. Tube that serves as a passageway for both air and food</li> <li>d. Large passageways in the chest that lead to the lungs</li> <li>e. Structure at the top of the trachea that contains the vocal cords</li> <li>f. Passageway between the pharynx and bronchi</li> </ul>

**12.** Gas exchange occurs in the \_\_\_\_\_.

13. Describe the process of gas exchange. \_\_\_\_\_

- 14. Circle the letter of each sentence that is true about gas exchange.
  - **a.** It is a very efficient process.
  - **b.** Exhaled air usually contains no oxygen.
  - c. The lungs remove about half of the oxygen of inhaled air.
  - **d**. The lungs increase the carbon dioxide content of inhaled air by a factor of 100.
- 15. Why is hemoglobin needed? \_\_\_\_\_

### Breathing (pages 959–960)

- 16. The movement of air into and out of the lungs is called
- 17. The large, flat muscle at the bottom of the chest cavity is the
- 18. Is the following sentence true or false? The force that drives air into the lungs comes from air pressure. \_\_\_\_\_
- 19. What happens when you inhale? \_\_\_\_\_

**20.** Circle the letter of the choice that describes what happens when pressure in the chest cavity becomes greater than atmospheric pressure.

- **a.** Air rushes into the lungs. **c.** The diaphragm contracts.

**b.** Air cannot escape from the lungs. **d.** Air rushes out of the lungs.

33.	Why is passive smoking particularly	harmful to young children?	
34.	Why is it so hard to quit smoking? _		
35.	What is the best solution for dealing w	vith tobacco?	

### WordWise

Match each definition in the left column with the correct term in the right column. Then, write the number of each term in the box below on the line under the appropriate letter. When you have filled in all the boxes, add up the numbers in each column, row, and two diagonals. All the sums should be the same.

#### Definition

- A. Fluid lost by the blood into surrounding tissue
- **B.** Thick layer of muscle in walls of heart
- C. Stimulant drug in tobacco smoke
- **D.** Passageway leading from the trachea to a lung
- **E.** Protein in red blood cells
- F. Small group of heart cells that set the pace for the heartbeat
- G. Lower chamber of the heart
- **H.** Disease in which tissues of the lungs lose elasticity
- I. Condition in which fatty deposits build up on the walls of arteries

#### Term

- 1. myocardium
- 2. ventricle
- 3. pacemaker
- 4. atherosclerosis
- 5. hemoglobin
- 6. lymph
- 7. bronchus
- 8. nicotine
- 9. emphysema
